SUMMARY

Software Engineer with 3+ years of hands-on experience in full-stack development and applied AI. Built and shipped production systems for real clients, working on REST APIs, database design, backend systems, computer vision, and NLP-based projects. Takes ownership across the full cycle from development through deployment and ongoing improvement. Published researcher in object detection and transformer-based text summarization.

EDUCATION

Gandaki College of Engineering and Science

Bachelor of Computer Engineering, Pokhara University

Pokhara, Nepal

Jul. 2021 – Aug. 2025

Relevant Coursework: Machine Learning & AI, Natural Language Processing, Database Management Systems, Data Structures & Algorithms, Theory of Computation, Operating Systems, Programming Technologies

EXPERIENCE

Software Engineer

Giga Infosoft Pvt. Ltd. (Full-time)

Nepal

Jul. 2024 – Mar. 2026

- Took full ownership of the company's web applications across frontend, backend, and database layers, reducing bug backlog by approximately 40% through systematic refactoring and code review.
- Worked directly with clients across different projects to gather requirements and deliver solutions on schedule, maintaining a 100% on-time delivery rate.
- Designed and integrated REST APIs with third-party services, cutting manual data-handling time for clients by roughly 60%.
- Engineered and deployed 6 live institutional web portals for schools and organizations using Python, FastAPI, Django DRF, Next.js, and ReactJS:

– <https://gigainfosoft.com.np>

Company portal

– <https://kalikaschoolbtl.edu.np>

Kalika School

– <https://kbps.com.np>

KBPS

– <https://eagerbridge.edu.np>

Eager Bridge Educational Portal

– <https://nnc.org.np>

NNC Organization

– <https://autoways.com.np>

Autoways

Co-Founder & Founding Engineer

FlintIT (Startup)

Nepal

Jan. 2023 – Dec. 2023

- Co-founded the startup and worked on technical decisions including system design, deployment, and client delivery.
- Built AI-powered web applications with features like text analysis, image recognition, and data processing to solve client needs.
- Handled client communication and delivery from start to finish without a dedicated project manager.

Freelance Software Engineer

Self-employed

Nepal

Jan. 2022 – Dec. 2022

- Built full-stack web applications for clients, working on frontend, backend, and database systems.

- Integrated databases and third-party services to deliver complete, working applications.
- Worked on adding basic machine learning features like text classification and image-based processing in web applications.

SELECTED PROJECTS

InBrowser Proctoring System *Computer Vision, Object Detection, Gaze Tracking*

- Built a browser-based exam monitoring system combining facial recognition, gaze tracking, and real-time object detection to flag suspicious behaviour during online exams. Detection pipeline runs at 25+ FPS in-browser. Research published in JAICN.
- <https://github.com/icarus-20s/eproctor>
- *Stack*: Python, YOLOv8, DeepFace, JavaScript

News Summarization using BART *NLP, Transformers, Deep Learning*

- Fine-tuned the BART transformer on XSum and CNN/DailyMail datasets (300k+ articles) to generate abstractive summaries of long-form news articles, achieving strong ROUGE scores on both benchmarks. Published at ICET-2025.
- <https://github.com/icarus-20s/news-summarization-using-bart>
- *Stack*: Python, PyTorch, HuggingFace Transformers

Facial Emotion Detection *Computer Vision, Deep Learning*

- Built a real-time system that identifies and classifies 7 facial expressions from a live video stream using deep learning inference.
- https://github.com/icarus-20s/emotion_app
- *Stack*: Python, DeepFace, OpenCV

Question Paper Builder *Desktop Application, GUI*

- Built a desktop tool for teachers to compose and format exam question papers through a graphical interface, cutting paper preparation time from hours to under 15 minutes.
- <https://github.com/icarus-20s/paper-build>
- *Stack*: C++, Qt Framework

MeroShare Automation *Automation, API Integration*

- Built a service that automates the share application process on the MeroShare platform via its API, reducing a 10-minute manual task to a single command.
- *Stack*: Python, FastAPI

College Management System *Full-Stack Web Development*

- Designed and deployed an academic platform managing enrollment, attendance, and grade records for 500+ students in one system.
- https://github.com/icarus-20s/College_Management
- *Stack:* Django, Python, PostgreSQL

HONORS & AWARDS

- **First Place** – Coding Competition, GCES IT Expo, 2024
- **Project Showcase** – AI-Based Emotion Detection System, GCES IT Expo, 2023

SKILLS

Programming Languages: Python, JavaScript, SQL, C++, Go

AI / ML: PyTorch, TensorFlow, Scikit-Learn, HuggingFace Transformers, YOLOv8, DeepFace, NLTK, LLM RAG, pandas, NumPy

Frameworks: Django, FastAPI, ReactJS, Next.js, Redux, Tailwind CSS

Tools and Infrastructure: Docker, Git, GitHub Actions, Redis, PostgreSQL, Linux, Bash

Soft Skills: Client communication, technical ownership, independent problem solving, cross-functional collaboration

Languages: English (fluent), Nepali (native)
